

Ring Sizing Chart

You're not the first guy to try and secretly find out your partners finger size and you wont be the last. We've seen just about everything, from panting red faced guys who have raced into the store clutching a ring to get sized in a hurry while the girlfriend has taken it off for a moment to guys who have tried on a ring and know her ring fits to the first knuckle on the little finger of his left hand. This page may well be your salvation.

Firstly, the absolute best way to ensure the best fit is to have her come in to Holdsworth Bros. and get professionally sized. But that would ruin the surprise obviously.

Secondly, you can try measuring the diameter across the inside of the band. You need to be accurate to 0.5mm to get within one size.

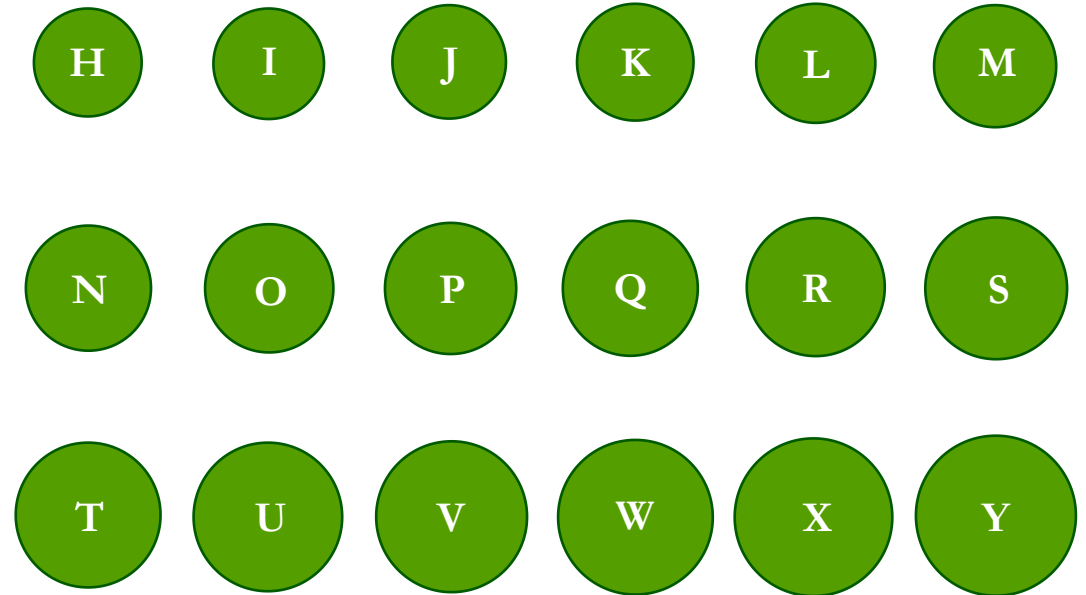

Thirdly, you can follow these instructions.

1. Find a ring of hers that fits the finger you want to place a ring on, preferably one of a similar width and similar style to the one you want to buy.
2. Print out this page. Do not shrink to fit or scale page. Print out at 100%.
3. Measure this line, it should be exactly 5cm in length.

4. Place the ring over the circles opposite

5. Find the circle which completely fills the inside of the ring without overlapping.

Inner diameter
